UR Medicine Laboratory Relocation Project

Date: April 29, 2019

Over the next several months UR Medicine Labs will be transitioning a majority of laboratory operations to our new site located at 211 Bailey Rd, West Henrietta, NY 14586. Our new state of the art laboratory will increase efficiencies, provide much needed space to accommodate significant growth as well as to better serve the medical community.

In this transition we will be consolidating many laboratories, including some currently located at Strong Memorial Hospital and our entire Ridgeland Road site. A significant portion of our operations will remain at Strong Memorial Hospital, as well as those from our affiliate Hospital laboratories.

The majority of testing performed by UR Medicine Labs will continue with little or no disruption. In some cases, we will need to send testing to other facilities for a short time. Notification will be sent when this happens.

Thank you for your understanding and support.

From: Melissa Allen

Director of Operations, UR Medicine Labs
