

Blood Lead: Capillary and Venous

Date: June 21st, 2022

Effective Date: July 16th, 2022

Per CDC guidelines, reference ranges will be updated for Blood Lead Capillary (PBCAP) and Blood Lead Venous (PBVEN) testing.

For ages 0-5 years, the reference range will be ≤ 3.4 $\mu\text{g/dL}$. For ages ≥ 6 years, the reference range will be ≤ 5.0 $\mu\text{g/dL}$.

With this change Blood Lead values will now be rounded and reported to one decimal place. The reporting comments have been updated as well.
