

Reticulocyte Count: Update

Date: November 7th, 2022

Effective Date: December 15th, 2022

As of December 15th, 2022, all manual reticulocyte testing at UR Medicine Strong Memorial Hospital and Highland Hospital will be replaced by an automated method. Any automated reticulocyte counts that exceed 30% will now be reported as ">30%". Manual reviews for reticulocytes will be performed only for quality assurance purposes and will not be orderable by providers.

If you have any questions please contact Mary Johnson, Chief Supervisor for Hematology & Chemistry Laboratory at Strong Memorial Hospital, at (585)275-2435 or MaryG_Johnson@urmc.rochester.edu, or one of the medical directors via the methods listed below.
