## Thromboelastography Testing (TEG): Critical Values

Date: April 19, 2018

---

Effective Date: May 16, 2018

The Thromboelastography test (TEG) will have the following critical value thresholds starting May 16<sup>th</sup>:

- R Time > 12min.
- Alpha Angle < 40 degrees
- Maximum Amplitude (MA) < 40 mm
- Fibrinolysis (LY30) > 10%

Test values that meet this criteria will result in notification of the ordering provider or unit per the Clinical Laboratory Critical Value Immediate Notification Policy
